Mr. Brown is vice president and general manager for CSC's Aerospace business unit within the Federal Sector – Defense Group. He joined CSC in August 2003, with operational responsibility for the delivery of quality information technology solutions, customized support services, and space systems solutions to the Air Force.

Mr. Brown has enjoyed a distinguished career as an Air Force fighter pilot, engineer, NASA astronaut, NASA manager, and corporate manager. His unique combination of operational and technical experience has made him an invaluable asset to the Air Force, NASA, and Computer Sciences Corporation. This was clearly demonstrated during two highly successful space shuttle missions, as a member of the Challenger Accident Investigation Team, as a member of the Solid Rocket Motor Redesign Team, as the senior astronaut on the Space Station Program, as a GRC International, Inc., Program Manager, as an AT&T District Manager, and as a CSC Vice President and General Manager.

Since joining CSC in 2003, Mr. Brown has led a \$170M business unit focused on support to the Air Force. The Aerospace business unit of CSC specializes in space operations, information technology, logistics, communications, financial management, and systems engineering. Mr. Brown also serves on the board of directors of the Wright Air & Space Center which is a non-profit aerospace science center being developed for the Dayton area.
